HALF MARATHON PACE = 4:15 per km

TEMPO PACE = 4:10 per km

10KM PACE = 4:04 per km

INTERVAL PACE = 3:50 per km

THINGS TO REMEMBER

- ★ This training plan is not randomly divided over 12 weeks, each session builds on the previous one, so don't be tempted to swap weeks around to suit your schedule.
- ★ However, you can change the days within a week. Just remember to rearrange the rest days, too, to ensure maximum benefit from each session.
- ★ Complete the easy stuff easy and the hard sessions hard. Take the rest days seriously, too. The training will stress your body and it will need recovery time.
- ★ Stretching and using a foam roller is an essential part of run training, this will help improve your running and most importantly keep you injury free. Regular massages on rest days are also recommended.
- ★ If possible, avoid completing every session on a hard surface. Soft surfaces, like grass, dirt and sand, put less strain on your body, reducing the risk of injury, and provide a well-rounded workout because you will be forced to shift and adjust to uneven terrain, using muscles you might not on tarmac.
- ★ Neglect nutrition at your peril. Get used to consuming gels in training and don't try anything on race day that you haven't already put into practice.
